## Technology

Technology plays an important role in the Improsys software. Software provided by Improsys is compatible and can be used on terminals such as laptop, mobile phones and HHT devices. Improsys Software is compatible with 1D, 2D, barcodes, RFID's and can be integrated with smart IoT devices such as Weighing Scales, Pressure Sensors, temperature Sensors, etc. enabling a competitive edge for our clients. Improsys invests in R&D activities to work on future technologies like AR/VR solutions, Smart Factory, etc. Improsys uses latest technologies like Microsoft Visual Studio, MS-SQL, Power Automate and Microsoft Power BI tools and offer software solutions on web and mobile platform.

Most of the Improsys software development, quality assurance, infrastructure and financial management activities are outsourced resulting in quality product and services at affordable and economical price tags. The core of Improsys business objective of value enhancement for client is achieved with expert involvement of on-role business consultants having wide experience of offering business and technology solutions

## Systems Management Processes and International Standards

Improsys firmly believes in system-oriented working and the company philosophy, missions, business objectives, and quality objectives are defined resulting into appropriate operational, security and business continuity policies.

Standard Operating procedures for various business process such as Marketing, Sales, Operations, Admin, Finance, Support which are pre-defined and well documented.

Improsys is certified with Quality management standards ISO 9001:2015 and Information Security Management standards ISO 27001:2013. All systems and procedures are periodically audited for compliance of standards
